

UKCF BAME Infrastructure Fund Privacy Notice

UKCF is offering grants to voluntary and community organisations to respond to the needs of their communities' affected by the Covid-19 crisis.

This **Privacy Notice** explains your rights and gives you the information you are entitled to under the Data Protection Act 2018 and the General Data Protection Regulation ("the Data Protection Legislation"). Note that this section only refers to your personal data that we process (e.g. the details of individuals at your organisation - name, date of birth, home address, email address, phone number, and the details of your organisation's finances).

Who controls the information you provide?

Background information

The grants for this programme will be made from funds raised by the National Emergencies Trust public fundraising appeal, of which £20 million is provided by The Office for Civil Society, a directorate of the Department for Digital, Culture, Media and Sport (DCMS). This means that not all of the grants will be from DCMS funds.

The funds are passed to UK Community Foundations for central administration

Why are we collecting and processing your personal data?

At the application stage, the personal data we process are the details of a legally responsible individual at your organisation - name, date of birth, home address, email address, phone number – and the details of your organisation's finances. This is processed by us to conduct organisational checks for the purposes of grant making and fraud detection and error after the grants have been made (this is called "post grant award assurance").

We will also hold contact details (name, phone number, email address) of an individual at your organisation to maintain contact during the programme.

Your data will be held with UK Community Foundation and DCMS for the purposes of post grant award assurance activity to enable DCMS or an organisation acting on its behalf to identify funds that have been paid in incorrectly, either because of fraud, error or if a grant duplicates a grant made by another funder.

We would usually conduct robust checks before grant making but because of the urgency of the COVID emergency situation it can often be difficult to put in robust up front controls, because of the speed that we have to operate at. This grant making process will therefore be supported by a robust post grant award assurance activity.
